

Mitutoyo

Precision is our Profession

Precision is our Profession.

Mitutoyo first focused its attention on manufacturing micrometers in Japan in 1934, and we have spent close to three quarters of a century since then producing precision measuring instruments. As a specialist in precision measurement, Mitutoyo has its eyes fixed firmly on the future, responding to the needs of industry for greater precision, greater speed and labour saving solutions with measuring technology that is always on the leading edge.

Mitutoyo Canada Inc., Mississauga, Ontario

Proudly Serving Canadian Industry.

Our philosophy is that the sale of a product is not the end of the process, but the beginning of a long term partnership with our customers. Established in 1973, Mitutoyo Canada Inc. has been bringing the full spectrum of Mitutoyo's R&D, manufacturing expertise, products and knowledge to the Canadian manufacturing market to help industry improve product quality and company profits.

Mitutoyo offers total metrology solutions for today's manufacturing challenges and is trusted worldwide to deliver quality, affordability and durability. Our wide array of measuring devices totals over 8,000.

Mach and Mach-V CMMs are designed for in-line manufacturing processes

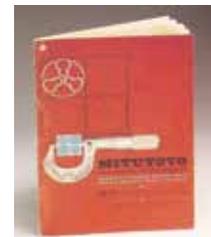

As a leader in the precision measuring instrument market, it is Mitutoyo's responsibility to advance precision measurement technology at the manufacturing level. We therefore wish to be broadly involved in every industrial field through one common element: measurement.

Canadian Corporate History.

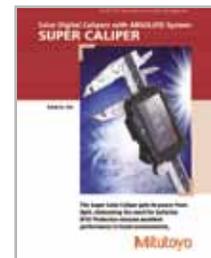

- 1973** MTI Canada Ltd. is incorporated. Although the company operates independently, it is wholly owned and is part of MTI Corporation.
- 1974** Official opening in Montreal, Quebec.
- 1978** First CMM sold in Canada (and it's still in use!)
- 1978** MTI moves to new building constructed in Mississauga, Ontario.
- 1983** First digimatic tools sold in Canada.
- 1986** Satellite office in Montreal, Quebec opens with M³ Solution Centre.
- 1988** New 50,000 sq. ft. facility was erected in Mississauga, Ontario and is the present site of the main office and M³ Solution Centre.
- 1995** First in-line CMM system installed in Canada.
- 2000** Renamed to Mitutoyo Canada Inc.
- 2002** Mitutoyo Calibration Laboratory grand opening.
- 2003** Laboratory receives ISO 17025 Accreditation.
- 2005** Field Service Group receives ISO 17025 Accreditation.
- 2006** Japanese Business Development department established. CMM calibration service accredited to ISO 17025. M³ Solution Centre design renovations.
