# PRODUCT INFORMATION

## Borematic

### Series 568 - ABSOLUTE Digimatic Snap Bore Gauges

The 568 Series Borematic system has now been updated with new design features. The popular three large button design which is used in products such as the ABS Digimatic Indicator ID-CX, has now been added in this design renewal, making buttons easier to press and operations easier to perform.

#### FEATURES

- Larger LCD incorporates 11mm characters giving 1.5 times the character area of existing products, making measurement values much easier to read.
- Two preset values can be stored and two reference values (of ring gauge) can be recalled by one-touch operation.
- Function Lock prevents operation errors.
- TiN coating is applied to contact point for long wear life.
- The SPC connecting cable changes to "Flat Straight type"

**Connecting Cable Code number 905338 (1m)  
905409 (2m)**

Replacement models will be available once current stock is depleted.

Series 568 Borematic

See next page for more details

New display with 11mm character height and 3 key operation

#### New: Flat Straight type

#### Old: Round 6-pin type

#### Connection Cables
