

# NEW PRODUCT INFORMATION

## SurfaceMeasure Non-Contact CNC CMM Measurement

**Auto-scanning digital laser probe provides high speed, high accuracy non-contact measurement.**

- High speed scanning without powder or spray
- Intuitive automatic adjustment capabilities provide accurate scans regardless of workpiece colours and surface conditions
- Can be used for inspection, reverse engineering and 3-D data collection

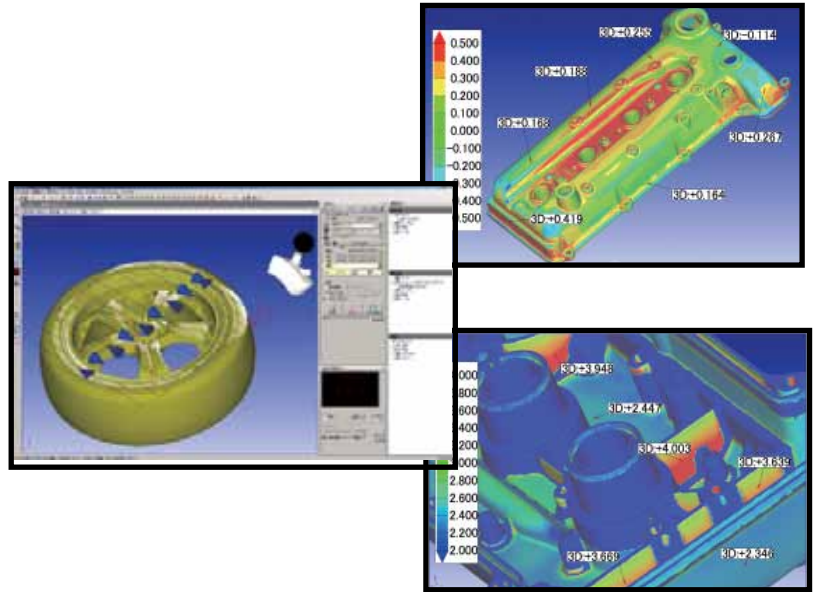

Automatically adjusts laser intensity and camera sensitivity to ensure stable scanning results on parts with mixed colours

Compatible with Automatic Change System for multi-probe inspection

# MSURF

- Workpiece geometrics can be captured as pointcloud data with the part coordinate system
- CADcompare reads in scanning data of CMM and pointclouds (ASCII, STL and most scanner formats)
- Data measurement evaluation system allows results output to Microsoft Excel.®
- Capable of multiple cross-section analyses
