**Whatever your challenges are,
Mitutoyo supports you from start to finish.**

Mitutoyo is not only a manufacturer of top-quality measuring products but one that also offers qualified support for the lifetime of the equipment, backed by comprehensive services that ensure your staff can make the very best use of the investment.

Apart from the basics of calibration and repair, Mitutoyo offers product and metrology training, as well as IT support for the sophisticated software used in modern measuring technology. We can also design, build, test and deliver measuring solutions and even, if deemed cost-effective, take your critical measurement challenges in-house on a sub-contract basis.

Traceability to NIST

Our gage blocks and other primary reference standards are calibrated at NIST. Our traceability is therefore direct to NIST, which eliminates potential quality problems and improves measurement uncertainty.

Environmental Controls

All our laboratories employ state-of-the-art temperature control systems to keep the temperature constantly at 68°F or 20°C.

Integrity of Measured Data

Our laboratories continuously participate in national and international proficiency testing programs to validate our calibration methods, equipment and measurement uncertainties.

Superior, No-Human-Error Calibration Systems

Much of our state-of-the-art calibration equipment is safe-guarded from potential human error. We utilize fully-automated gage block comparators, coordinate measuring machines, and vision systems to improve overall measurement repeatability.

Certificate of Calibration

All prices shown include an A2LA accredited "Certificate of Calibration" to ISO/IEC 17025 (unless otherwise indicated). All certificates include measured values, measurement uncertainty, and all other requirements associated with being ISO/IEC 17025 accredited.

Our calibration laboratory is accredited by A2LA to ISO/IEC 17025:2005, ANSI/NCSL Z540-1-1994, and ANSI/NCSL Z540.3-2006. Our laboratory has been accredited by A2LA since 1998, and our A2LA Certificate Number is 0750.01.

Disclaimer: *Not all items on this list are covered by our A2LA scope of accreditation. For calibrations provided with an A2LA accredited certificate, please consult our Scope Cert. #750-01.*

Turnaround Time

Normally our laboratories maintain a turnaround time of 2 weeks.
